

Cofreth Passes Quality Management Systems ISO 9001:2008 Re-certification Audit with Zero Non-Conformance Report

By **ROHANA BT. DAUD**

Manager, Quality, Safety, Health & Environment

On 25th and 26th July 2011, once again the effectiveness of the company's Quality Management System (QMS) has been reviewed by the appointed certification body as part of the ISO rules. The audit was carried out by two experienced auditors from SIRIM QAS International Sdn Bhd to re-certify whether the entire management system requirements stipulated under ISO 9001:2008 standard is effectively maintained and improved throughout the company.

The audit areas comprises of session from management's commitment, employees' training and competencies, purchasing and procurement activities, internal audit and all

processes and activities carried out at site operations such as preventive maintenance, complaint handling, management of vendors and so on. Most of the departments in headquarter (HQ) and 4 project sites were involved during two days audit processes. Those sites were DiGi Shah Alam, Menara Prudential Kuala Lumpur, Menara PERKESO and Robert Bosch in Petaling Jaya.

Bravo to all Cofreth staffs on providing their full commitment. Your effort has been paid off because we have successfully passed the audit process with Zero Non-Conformance Report (NCR) and only minor observations being raised. With that, we managed to uphold our ISO 9001:2008 certification for 15 years continuously.
